FROM: Michael D'Angelo, Director, of Franklin Public Facilities *MDA*

DATE: January 12, 2017

RE: Asbestos and the Franklin Public Schools

This notification is required by the Asbestos Hazard Emergency Response Act (AHERA, 40 CFR part 763 of Title II of the toxic substances control act).

FLI Environmental is under contract with the Franklin Public Schools to generate and maintain the school department's 3-year AHERA plans and subsequent re-inspections. The licensed inspector has concluded that all visible asbestos frequented by students and staff throughout the school were properly encapsulated and maintained. FLI Environmental and the Franklin Public Schools Facilities Department are very confident that students, faculty and staff are not exposed to the potential hazards of airborne asbestos fibers.

Asbestos Management Plans have been developed for the Franklin Public Schools. Each building's plans are available and accessible to the public at each individual school's main office during normal business hours. Complete sets of the school buildings plans are available for review as the Office of Franklin Public Facilities during normal business hours.

Thank you,

Michael D'Angelo
